# **The Evraz Highveld Environmental Strategy ...growing to 2015 and beyond**

# Evraz Highveld complex map

# Strategy built on 3 core concepts...

# Evraz Highveld Environmental Strategy\*

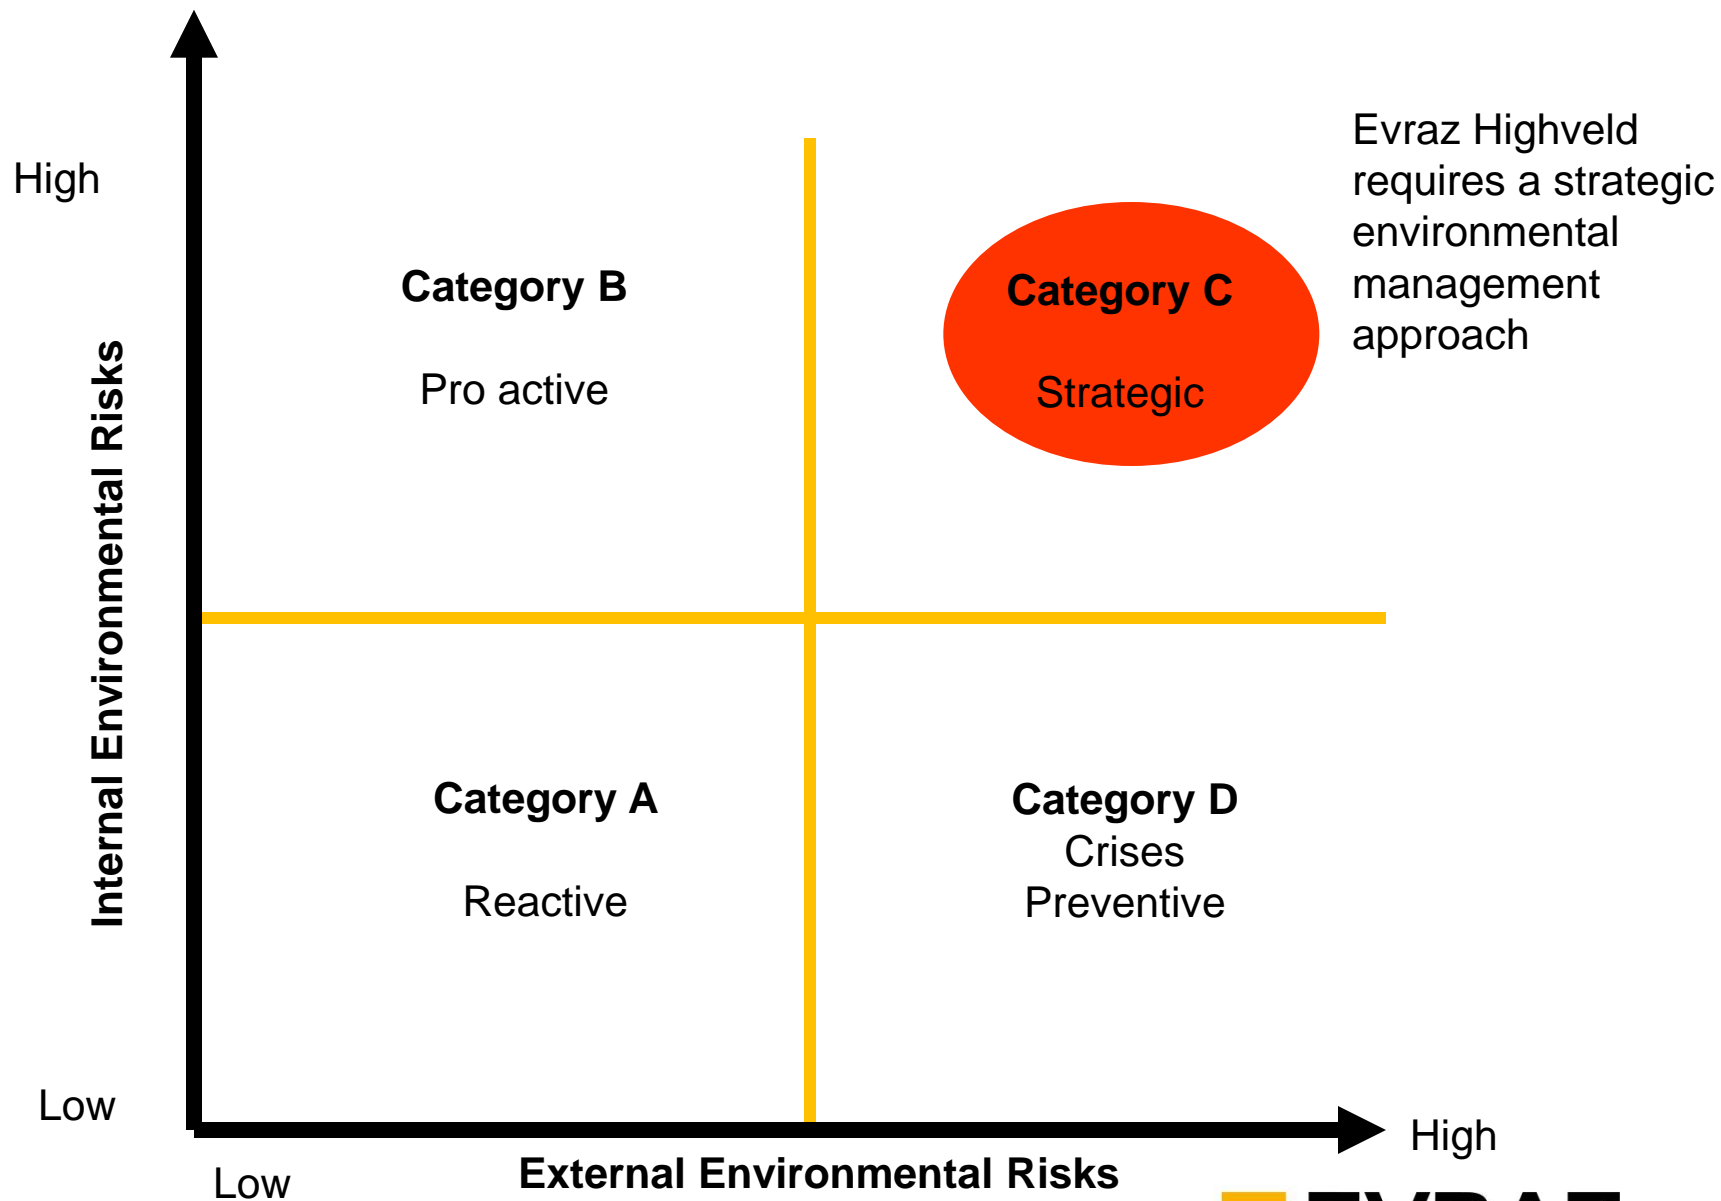

An environmental strategy, tailored to the Evraz Highveld Business Strategy and aligned to the following EVRAZ GLOBAL strategies:

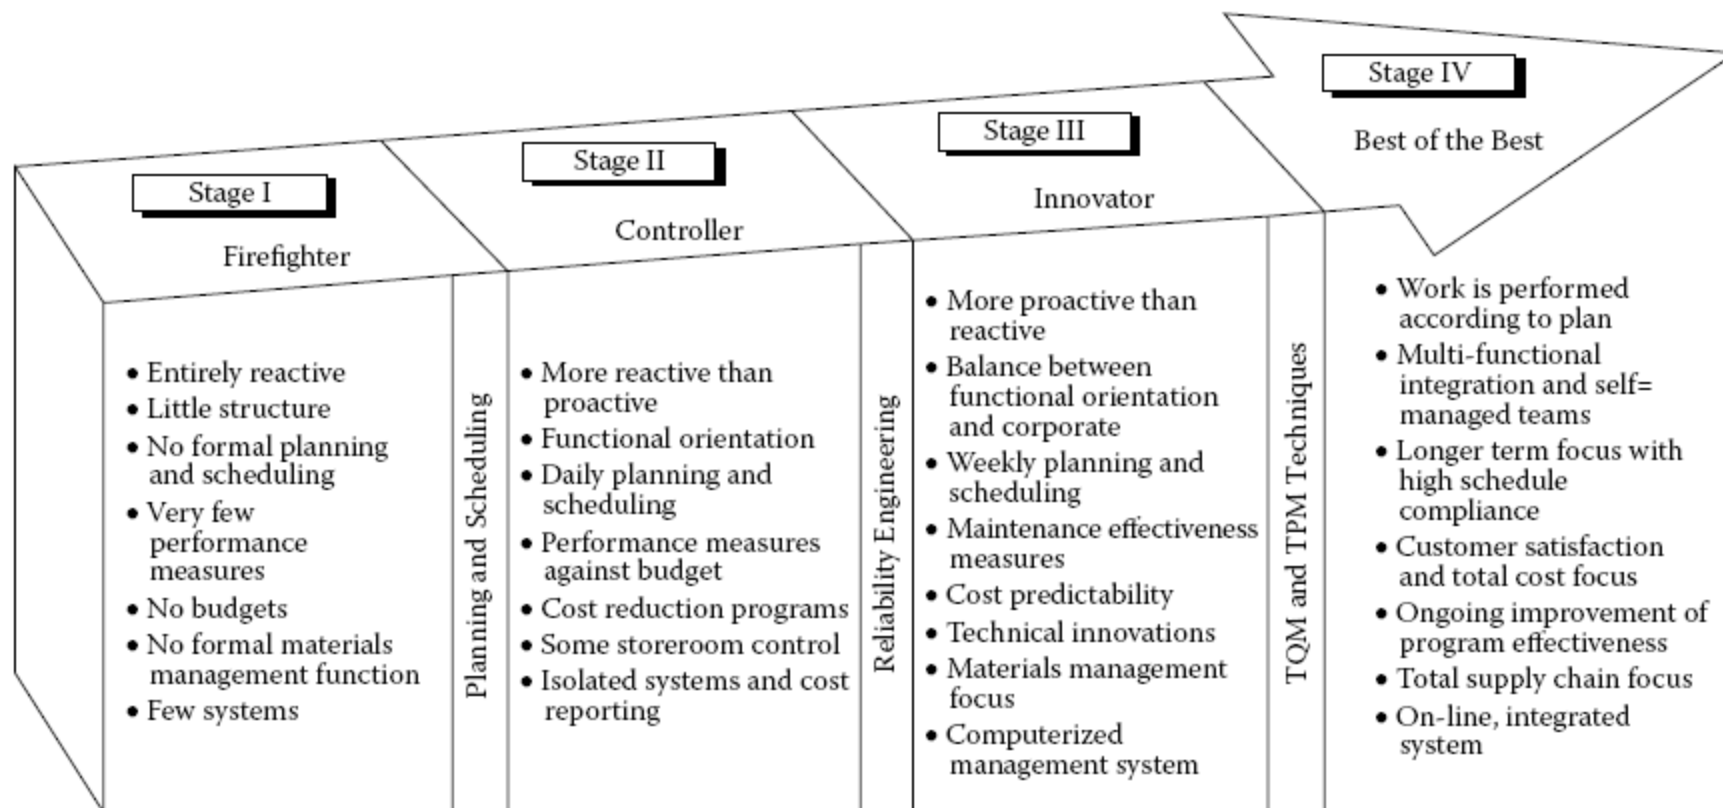

- Health Safety and Environment,
  - Business Growth and
  - Evraz Business Systems,

...that addresses achieving compliance, allowing for recognizing business opportunities and allowing business growth (i.e. the doubling of business every five years) and addressing stakeholder expectations.

*\*“Strategy”: a pattern or plan that integrates the objectives, goals, policies and adoption of courses and actions which gives direction and coherence of action.*

# Where do we want to be?

Vision+ Skills +Incentive + Resources + Action Plan =  
Effective change!

# Our proposal: Our Environmental True North Metrics

# Our proposal: our Environmental True North Metrics

## Ecology:

- No increase of environmental footprint
- Zero process water discharge
- 100% Rehabilitation of disturbed land per annum

- 0 category 3-5 environmental incidents per annum

## Stakeholders:

- 0 community environmental complaints
- 0 government environmental complaints
- 0 internal employee environmental complaints

## Systems and processes

- Zero waste to landfill
- 100% ISO 14001 certification
- 10% increase annually in implementation of cleaner production technologies
- 100% integration of environmental requirements in applicable business units
- 100% representative environmental monitoring in place for land, air and water

# Environmental Policy

**EVRAZ Highveld is a large vertically-integrated steel and vanadium slag producer.**

**Evraz Highveld recognises that economic success in a growth orientated regulatory framework goes hand-in-hand with improving our social and environmental performance. In order to achieve this Evraz Highveld commits to the following:**

1. To comply with the requirements of applicable environmental laws, regulations, relevant codes of practice and industry standards to which we subscribe as a minimum level of environmental performance.
2. To operate processes that are socially responsible, scientifically based and innovative, economically sound and, which make the most efficient use of natural resources and energy and to continuously improve our environmental performance.
3. To minimise the environmental impacts of our business and to prevent pollution by measuring and continually improving our environmental performance through a regularly reviewed programme of objectives and targets that promote the water and waste hierarchy, promote biodiversity and reduce air and carbon emissions.
4. To proactively improve our environmental performance through the implementation of a structured integrated environmental management system throughout our company and integrated into all operating divisions supported by a methodical monitoring program.
5. To support and implement programmes that educate, train and inform our own employees, those who operate on behalf of the company and our suppliers and customers, to conduct their activities in an environmentally responsible manner.
6. Ensuring open communication and dialogue with external and internal stakeholders on environmental aspects relevant to our operations.
7. Energy and carbon management is everyone's responsibility. All employees of EVRAZ Highveld will strive to use energy efficiently and to reduce our carbon footprint.
