

Evraz Highveld Steel and Vanadium Limited is a vertically integrated steel and vanadium slag producer. We mine titaniferous magnetite ore at our Mapochs Mine operation at Roossenekal, Limpopo and produce iron and steel products and vanadium-bearing slag at our Steelworks, based at our headquarters, at eMalaheni, Mpumalanga.

The Company is part of a multi national group that celebrates the talents of its diverse workforce.

The efficient manufacturing of our products, which have been used in a variety of projects such as soccer city stadium and the Nelson Mandela bridge, review on the capacity of our equipment.

Engineering is a vital part of our business and for this reason the business is seeking qualified Engineers who would be an acquisition for the Company and who meet following requirements:-

ENGINEERS:

Mechanical / Electrical Engineers, Metallurgists

- National Higher Diploma in Electrical / Mechanical Engineering / Metallurgical
- Degree in Electrical / Mechanical Engineering / Metallurgical

Should you be interested in a career with the Company kindly submit your curriculum vitae / resume together with your copies of certificates (Indicate your current cost to company). All documentation will be kept on our data base for future available vacancies.
